

Referral Tips

E-prescribe referrals

AllianceRx Walgreens Prime is helping to make prescribing easier and more efficient. E-prescribing can reduce the wait between the time a prescription is written and when the patient actually receives the medication. It also can effectively reduce the number of prescription errors attributable to hard-to-read handwriting or illegible faxes.

Helpful tips to hasten the process

REMEMBER to include the true date by which the patient needs the medication in hand

DO NOT write “urgent” or “stat,” as neither is an applicable date, and entering either will cause delays in your patient receiving medication

REMEMBER to fill out the ICD-10 code carefully, as many pharma programs require it, as well as diagnosis, in order to ensure that a patient will be eligible to apply for assistance

REMEMBER to include the patient’s current weight, as it may impact medication dosing
